

technical details (a)

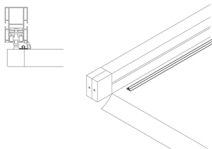

F3 Eight Wheel Slider

Four horizontal & four vertical rollers working together for perfectly smooth operation every time. The F3 eight wheel system is proven to remove the jamming issue that occurs with the 4 wheel system and can take loads up to 1300 lbs.

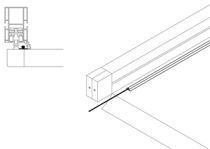

Rafter Stormguard Edge Seal

The rafter stormguard edge seal stops water from dripping over the side of the system by providing a soft cushioning barrier along the side of the system.

Fabric Anti-Drip Edge Cord

The fabric anti-drip edge cord works in conjunction with the stormguard edge seal to prevent any water leaks over the side of the system.

Fabric Anti-Drop Edge Cord w/ Electrical Cable

The fabric anti-drip edge cord works in conjunction with the stormguard edge seal to prevent any water leaks over the side of the system. This low profile cord also carries the electrical cable for the architectural lighting.
